

Hello, world

(How you're gonna do some fucking great work when you get outta here)

So you've graduated from this great program. Now what?

- Do 'Meet Your Makers'
- Apply to jobs
- Get your website up
- Tell the fuckin' world your website is up, that you build websites/software, and that you need some work. Promote the fuck out of yourself.

“Who the f is this crazy person & why should I
listen to anything she has to say”

SUCKING AT SOMETHING

IS THE FIRST STEP TO BECOMING SORTA GOOD
AT SOMETHING

Hard reality #1

Most people want to hire developers with experience, and you don't have any of that.

DARN.

Hard reality #2

Freelancing is hard.

So, you wanna freelance?

- Website
- Contract template
- Invoice template

Your toolbox

For communicating with clients

For tracking your hours/
money and invoicing

For building some
kickass contracts so ya
don't get screwed

For showing clients
project scope

For promoting the fuck out of yourself

For your portfolio site
(free & easy: always a good
thing)

Any social media you're
already on + your
LinkedIn

Hey there! I'm Tara. I'm a web designer & developer in Toronto, Ontario.

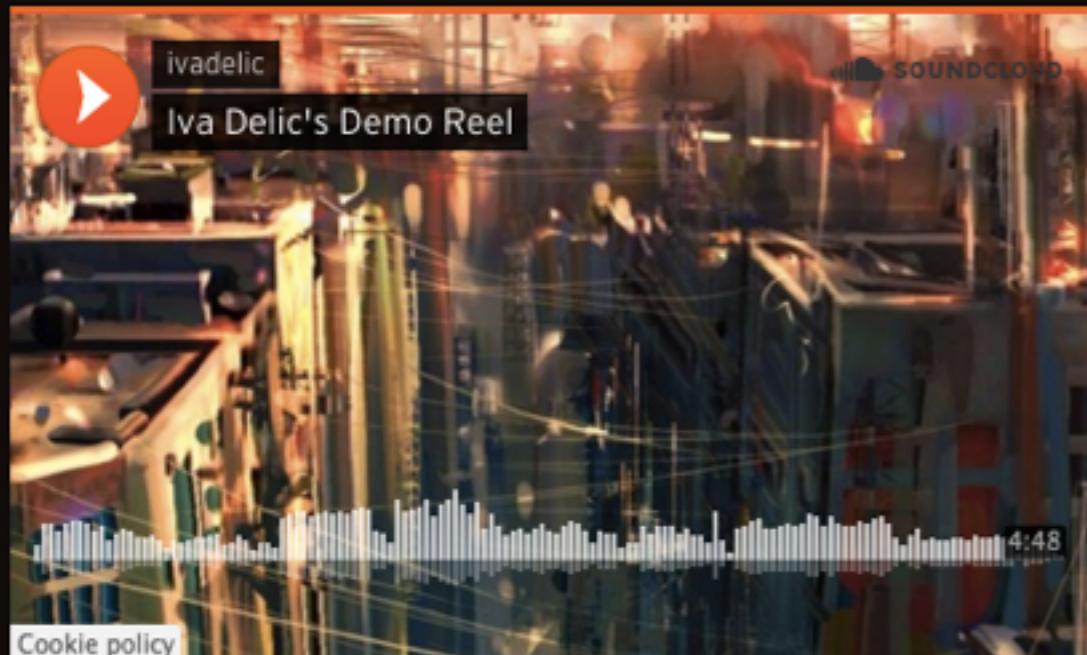

My background is in politics. I've worked on online communications for people like the Premier of Ontario and the former Chief Technology Officer of the United States, and to start my own freelancing business building websites and online communications tools for advocacy groups and political candidates. Doing this work made me realize my passion for building tools for people that solve problems, so I've started to learn how to do that as a recent graduate of Bitmaker Labs' Web Development course.

If you think you might like to work together, check out

Composing Coder

Email Me

I'm probably the only French and Croatian-speaking screen music composer turned coder that you'll meet today. One could say I code music and I code code. One could... but one could also say that I'm a hard working individual with a positive attitude who has a newfound passion for web development and coding. If I'm not coding, I'm watching great films and writing music.

Toronto

Some rules

**YAS QUEENI YAS QUEENI
YAS QUEENI**

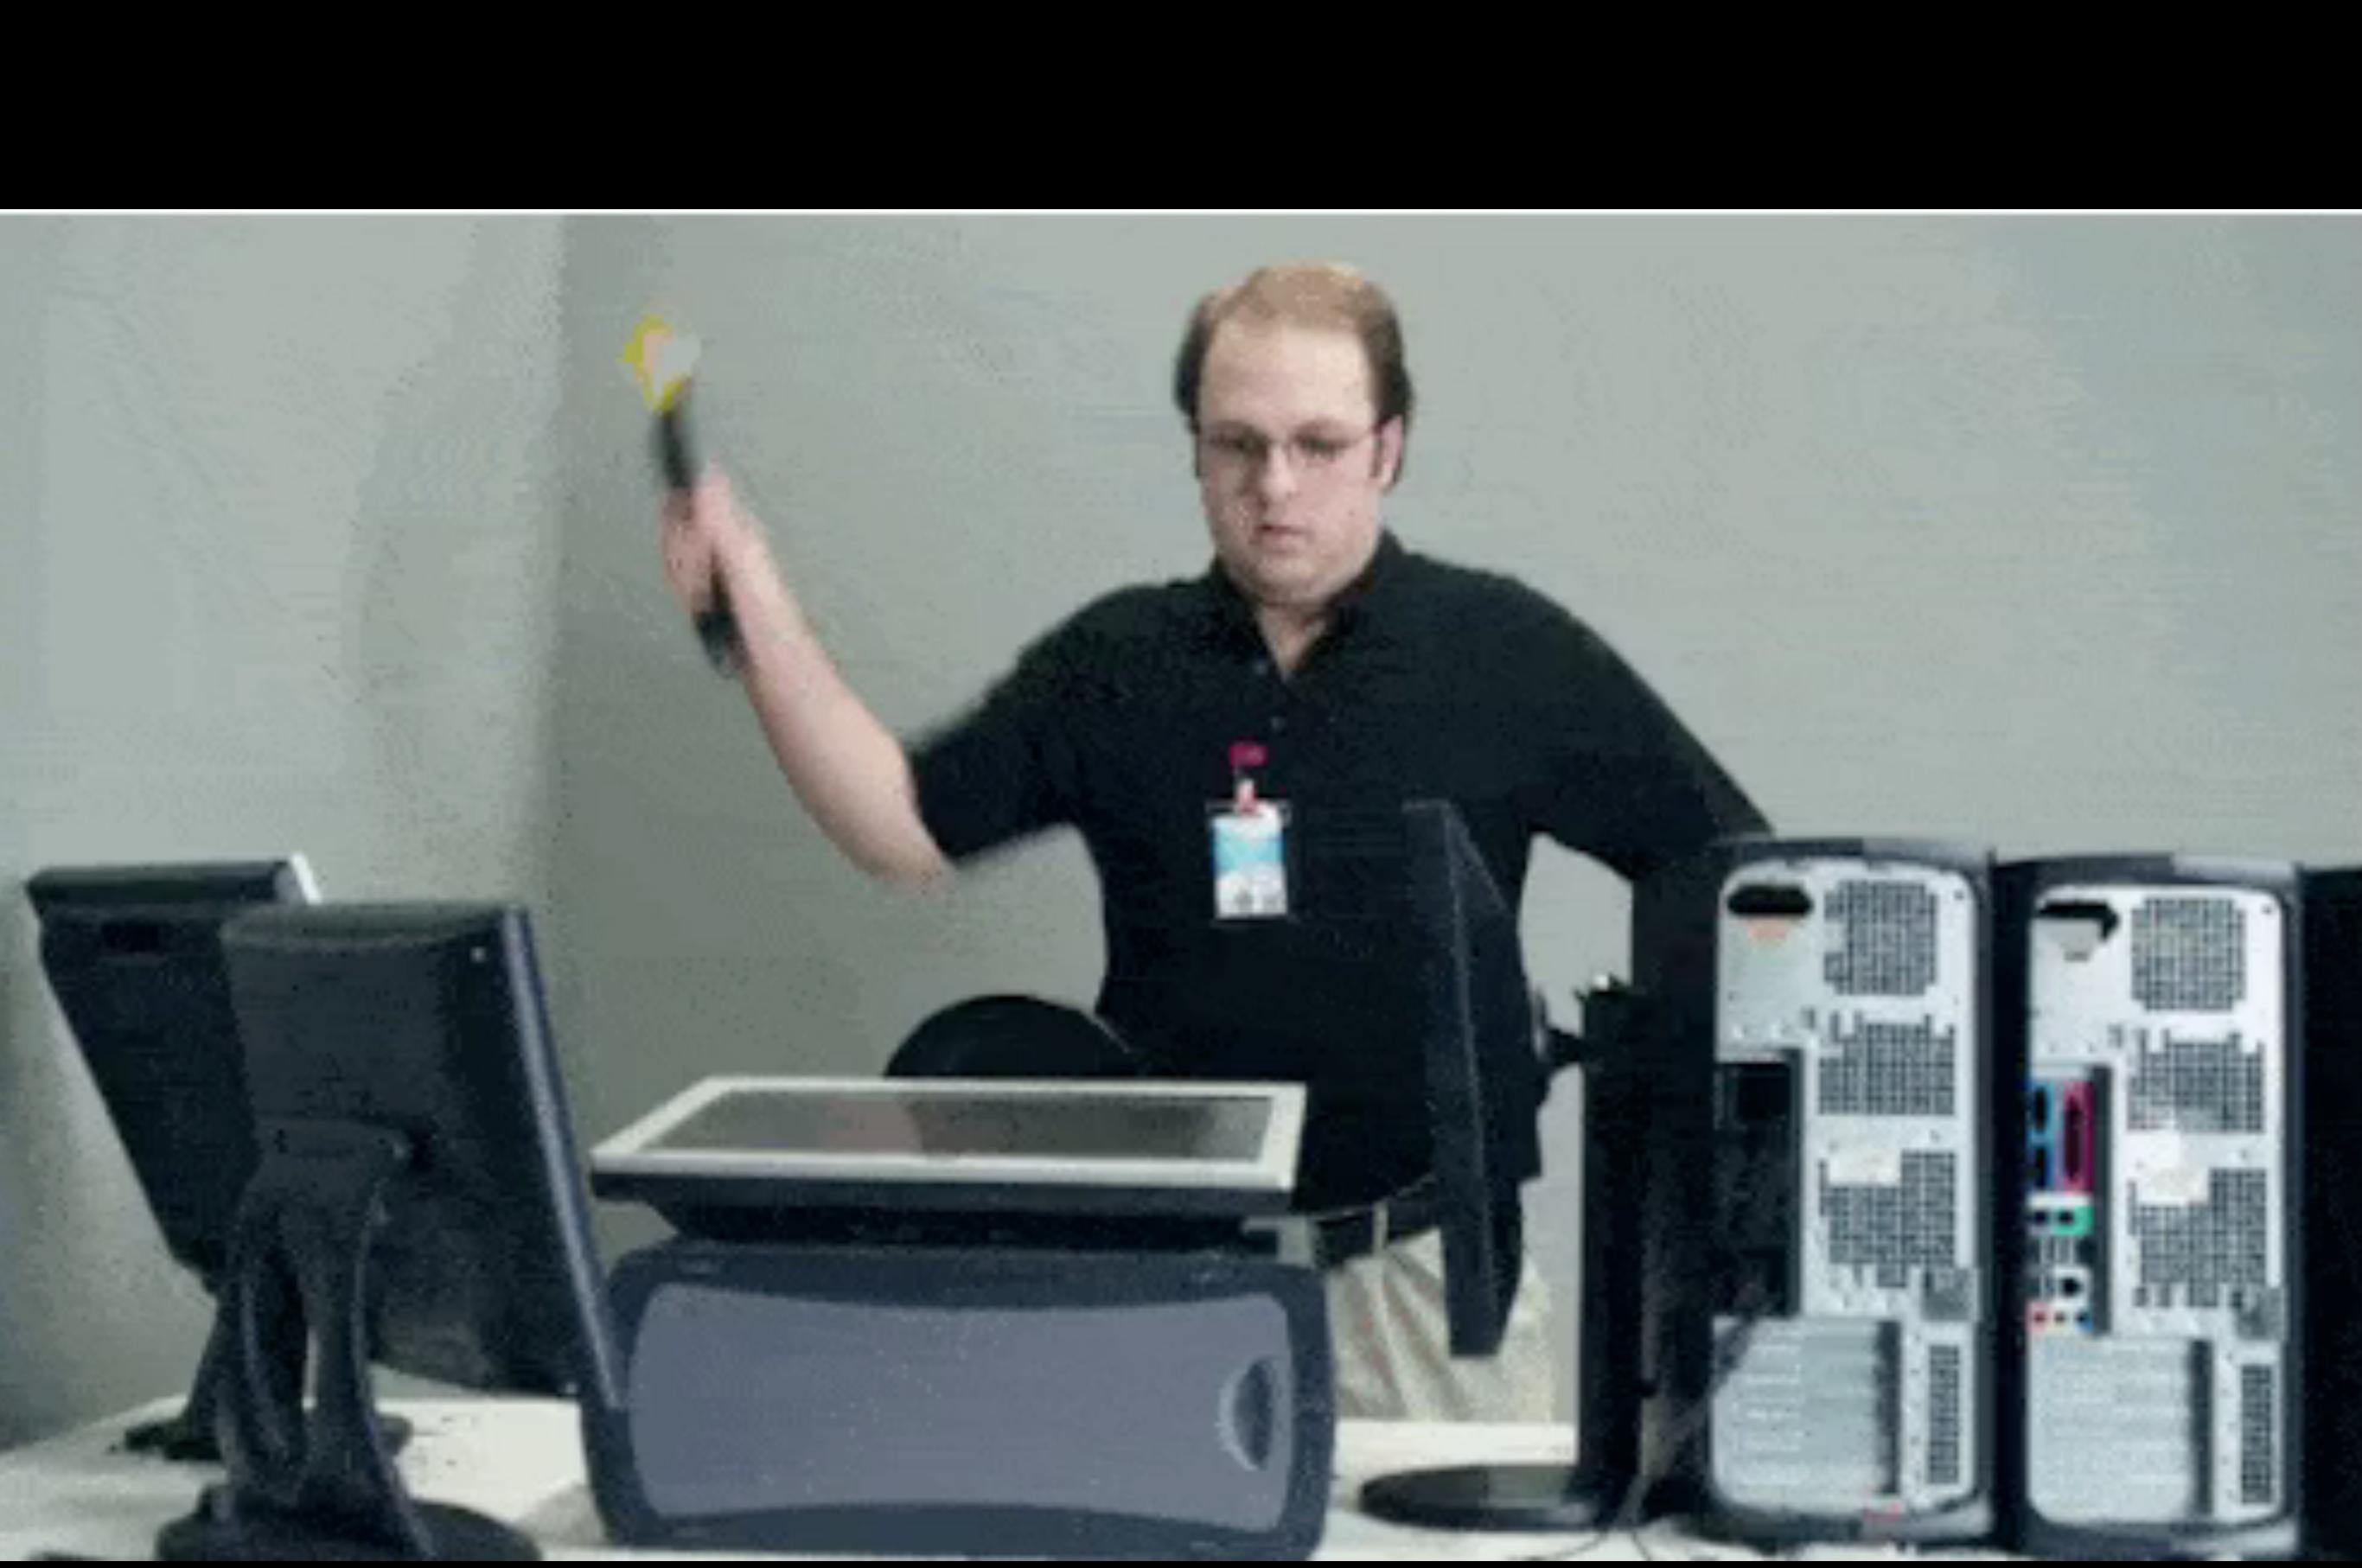

But some helpful tips

#1

Try to put on pants most days before noon

#2

The world is your office

#3

Take a break

#4

Ask for half up front

#5

Project fees are your friend

#7

Have confidence in your work

#6

Always reduce the amount of work you have to do

#7

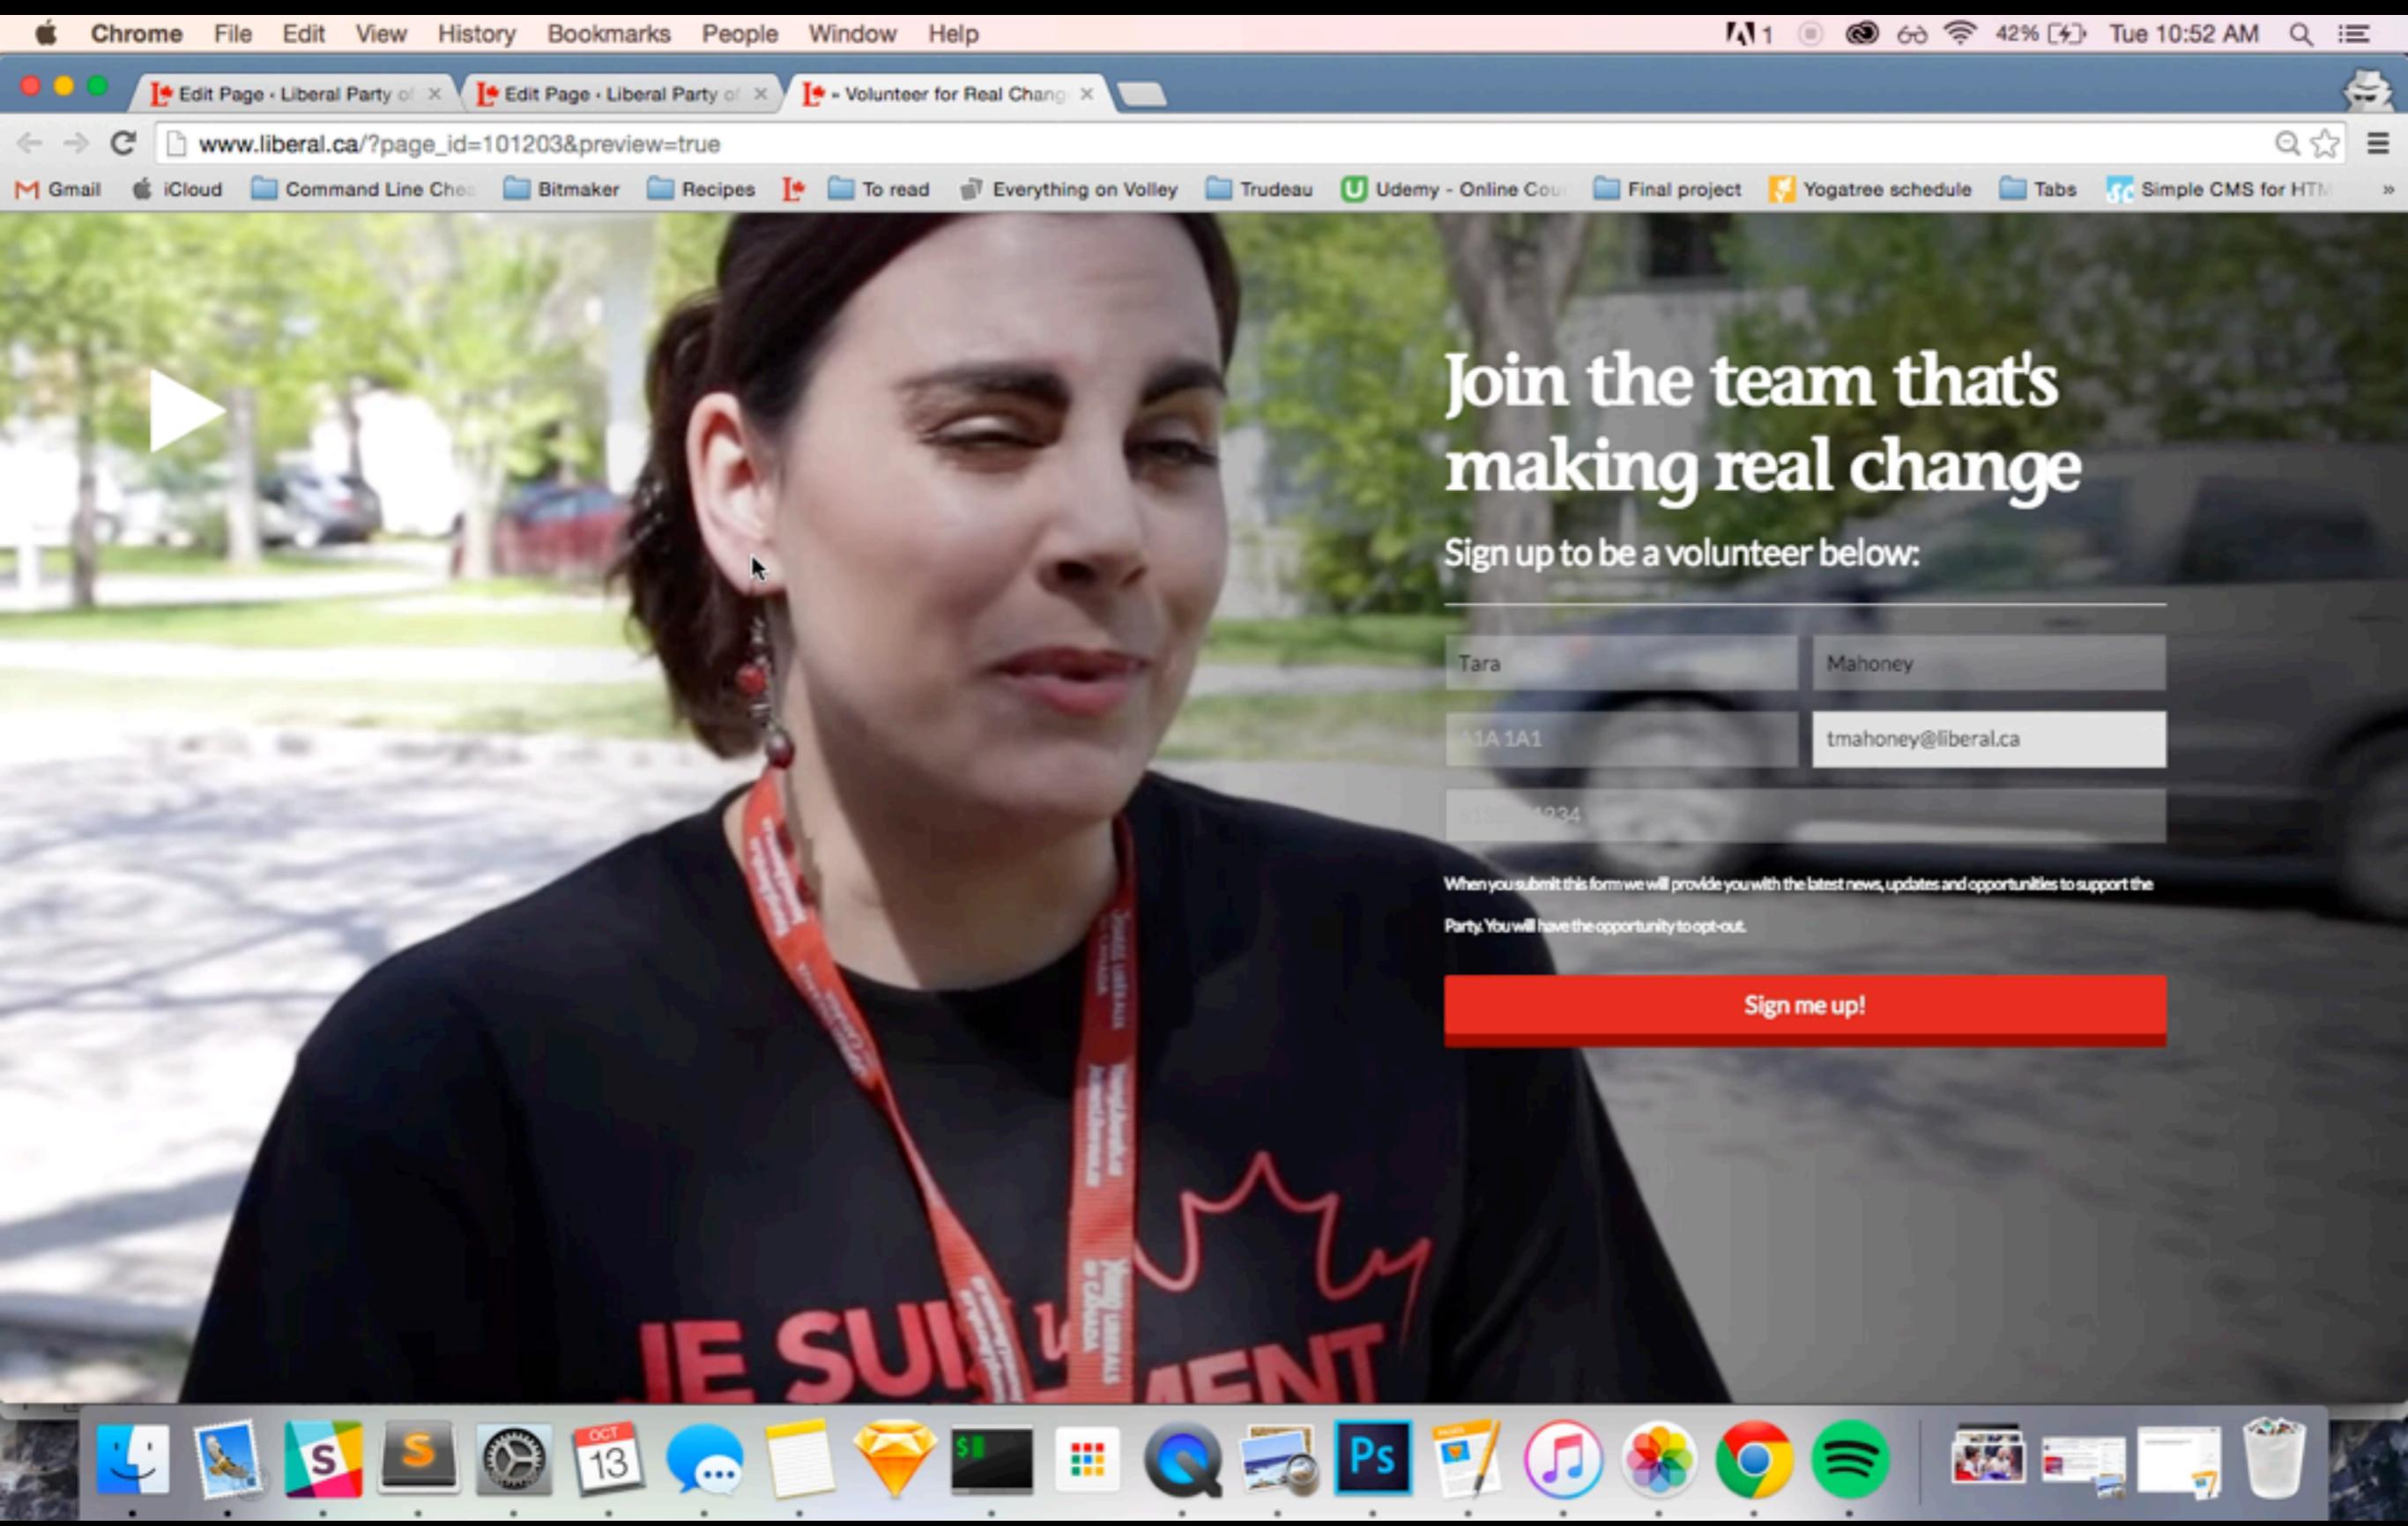

Find what works

#8

Enjoy the perks.

#8.2

Do some things you enjoy/are passionate about

Apps Gmail ICLOUD Command Line Che Bitmaker Recipes To read Everything on Valley Trudeau Ubermy - Online Co Final project Rogatree schedule Tabs

Justin Trudeau The Plan The Team Liberal Volunteer FR

This election will be close and your vote could make the difference.

Take 30 seconds to protect your vote and ensure you're ready for election day :

Shit to avoid

- Getting screwed
- Nasty clients
- Being shitty
- This is also just good life advice
